

ZOOP! (E837)

Enzyme digester and deodorizer for food, vomit, blood and other organic spills

FOR PROFESSIONAL USE ONLY

Removes protein stains and odors with the power of enzymes

APPLICATION: Spotter

DESCRIPTION

ZOOP! is formulated with a triple strain blend of high-performance, fast-acting enzymes for superior removal and deodorization of tough protein spots such as blood, gravy, coffee creamer, baby formula, milk products, fish, eggs, vomit, urine, feces, starches and other organic spills. ZOOP! spotter has a mild pH and can be used on synthetic and cellulosic carpet and upholstery fibers such as nylon, olefin, polyester, and cotton, as well as a variety of hard surfaces. ZOOP! also deodorizes the odors often associated with these types of spots. Its concentrated enzyme power generates more enzyme action on the spot.

FEATURES

- Fast acting: Penetrating power and concentrated enzyme action quickly removes the spot
- Deep cleaning: ZOOP! penetrates deep into the base of the stained area
- Easy to use, no mixing required
- Economical: High enzyme density means that just a small amount of ZOOP! Enzyme Digester removes even difficult spots

WHERE TO USE

Carpets: Removes common protein and starch spills such as food, blood, urine, feces, and dairy products.

Upholstery: Excellent for protein spills and stains on couches, chairs and other water-cleanable furniture. Pre-test before use.

Draperies: Removes protein soils that conventional drapery cleaners cannot remove. Pre-test before use.

Garments: Removes protein and food spots from clothing. Pre-test before use. Launder clothing after spoting.

USE DILUTION:

Ready to use – No mixing necessary.

USE DIRECTIONS:

1. Remove any surface soil. Apply ZOOP! Enzyme Digester directly to spot.
2. Allow dwell time for enzymes to work. Works best when warm. If needed, warm carpet or fabric with light mist from a steam iron (do not touch iron to carpet or fabric).
3. Rinse extract with All Fiber Rinse or warm water.
4. Repeat as needed.

USAGE TIPS:

- Store ZOOP! in a cool location, or refrigerate, to extend product life.
- Always blot, don't rub, when spoting, to avoid changing texture of carpet or fabric.
